BLOSJZ

Imagine, the weather outside is bleak, but indoors it's lovely and warm. Coming indoors after being outside gives you rosy cheeks. Once indoors you wrap yourself up in nice warm rug and grab a steaming mug of hot chocolate. Now add some plants from Blosjz and the picture is complete.

Blosjz brightens up your home during those dull and bleak days in autumn and winter. And it's precisely at such moments that Blosjz plants are at their best – just the right time to find them a perfect place indoors. In an decorative vase or pot in a spot where you can constantly enjoy them, they'll make your home wonderfully warm and snug.

The plants in the Blosjz collection are originally outdoor varieties but love to go indoors in autumn and create a snug feeling in your home and bring you further delight.

There are two different Blosjz – **Blosjz Berry** and **Blosjz Bloom**.

Blosjz Bloom flowers profusely from September to March in red, pink and white. Blosjz Berry is a plant that provides fabulous red, white or pink berries in autumn and winter.

Surprise yourself with the beauty of Blosjz plants!
